

**East York Animal Clinic**  
**Authorization for Outpatient Care Utilizing**  
**Non-conventional Treatment**

The College of Veterinarians of Ontario considers holistic therapies and holistic medications to be non-conventional due to lack of scientific validation. At East York Animal Clinic, our Veterinarians employ a holistic approach to patient care and they also practice conventional medicine. Our Veterinarians integrate all the available modalities and diagnostic procedures, whether considered mainstream or holistic, in the care of our patients. As part of our integrative approach to Veterinary medicine, we utilize a wide variety of holistic medications and therapies (please visit our website [www.holisticpetvet.com](http://www.holisticpetvet.com) for more details).

I am aware that both holistic and conventional therapies are utilized at the East York Animal Clinic, and I consent to the use of both in the care of my pet(s). Appropriate non-conventional and conventional treatments will be explained to me during my appointment. I understand that it is my responsibility to ensure my understanding of the treatment suggestions.
